

GENERAL INDEX TO VOLUME XIII.

Aberration and atmospheric refraction of light,—Results of an investigation of, made with a modified form of the Loewy prism apparatus, G. C. Comstock.....	329
Constant of—.....	258
Chromatic—of telescopes, James E. Keeler (note).....	157
The constant of— (note).....	258
Abney, Photographic investigations of Captain—(note).....	241
Captain, W. de W., C. B., R. E., D. C. L., F. R. S., President of the Royal Astronomical Society on presenting the gold medal to Mr. S. W. Burnham,—Address by.....	283
Academy of Sciences at Chicago, section of Mathematics and Astronomy, Meeting of the—Dec. 5, 1894, 87; Jan. 3, 1894, 173; Feb. 6, 1894, 262; March 5, 1894, 326; April 9, 1894, 419; May 14, 1894, 518; June 11, 1894, 602; Sept. 4, 1894.....	708, 782, 872
Royal Irish,—Transactions of—(note).....	779
of Sciences at New York, Meeting of the—.....	88, 415
Achromatic object-glass, A new triple—(note).....	400, 697
Address delivered by the President of the Royal Astronomical Society, Cap- tain W. de W. Abney, C. B., R. E., D. C. L., F. R. S., on presenting the gold medal to Mr. S. W. Burnham.....	283
Adjustment of the equatorial, Quick—(note).....	171
Agricultural College Observatory of Brookings, S. D., Observations of the transit of Mercury Nov. 10, 1894—(note).....	868
Air, Refractive index of liquid—(note).....	64
Algebra, Exercise book in—by M. S. Mc Curdy (notice).....	788
Algol, Eccentricity of the orbit of the companion of—(note).....	516
type of variable stars. (See variable stars)	
variable, erratum.....	786
Altitude, Variation of gravity with—(note).....	404
Apparatus for electrical control of telescope. (frontispiece).....	265
Apparent orbits of binary stars, A graphical method of determining the— Charles P. Howard.....	425
Application to metrology of light waves, A. A. Michelson.....	92
Analyse der Gestirne, Scheiner's spectral—(note).....	596
Annular eclipse of the Sun, April 5th, 1894.....	250
Anderson's variable in Andromeda (note).....	317
Andromeda, Anderson's variable in—(note).....	317
Arago medal for Professors Hall and Barnard (note).....	81
Argentine Observatory, The National—John M. Thome.....	8
9 Argus, Note relative to β 101—(note).....	518
Orbit of—S. W. Burnham.....	290

Arizona, An astronomical expedition from Harvard College Observatory to— (note).....	316
Atmosphere of the Sun, Is there oxygen in the—J. Janssen (note) 238; N. C. Dunér.....	215
On Brester's views as to the tranquillity of the—Egon von Op- polzer.....	581
Atmospheric pressures, of the United States,—The polar radiation from the Sun, and its influence in forming the high and low—F. H. Bigelow.....	25
Asteroids, A photograph of the Pleiades and two—H. C. Wilson.....	192
1893, Numeration of—.....	254
Asteroid, 1893, AO, Discovery of new—(note).....	79
1893, AP, Discovery of new—.....	168
1894, AQ, AR, and AS, Discovery of new—.....	254
1894, AT, AU, AV, AW, AX, AY, AZ, Discovery of new—.....	323
Astigmatism of Rowland's concave gratings, On the—J. L. Sirks.....	763
Astrolabe, Margaret L. Huggins.....	793
Astronomical instruments, Electric control and governor for—F. L. O. Wads- worth.....	265
Observatory of Harvard College, Vol. XXV (note).....	171
photographs, Reproduction of—(note).....	315
expedition to Arizona from Harvard College Observatory (note).....	316
photographs, A collection of—G. E. Hale (note).....	693
photography, The progress of—(note).....	699
(note).....	783
publications I. W. W. Payne.....	23
and Physical Society of Toronto, Canada, Meetings of—Dec. 1893, 174; Jan. 1894, 262; Feb. 1894, 327; March 1894.....	418
Report of meeting.....	786
Astronomy, Mathematics and—in the University of Chicago (note).....	601
Meteoric—III. D. Kirkwood.....	188
and geology—Untrodden ground in—(note).....	325
The bibliography of—(note) 261; (note) 519; (note).....	603
The Dawn of—(note).....	259
Astrophysical journal, The—Geo. E. Hale..	831
Atmospheric refraction of light, made with a modified form of Leowy prism apparatus, Results of an investigation of the aberration and—Geo. C. Comstock.....	329
Auriga, On the new star in—H. C. Vogel, 48; (notes) 66; 136; H. Seeliger.....	142
Aurigæ, Nova—E. E. Barnard (note).....	598
Professor Vogel on Nova—(note).....	150
Change in the brightness of Nova—(note).....	156
Nova—and Nova Normæ, A study of—W. H. Pickering.....	201
On the visual appearance of Nova—William Huggins.....	314
Note on Nova—M. Brendel, (note).....	315
Auroræ, Height of—J. A. Copland (note).....	506
and solar prominences, M. A. Veeder (note).....	597
Aurora observations, North Greenland—(note).....	779
International cipher code for—(note).....	170
of March 30, 1894, J. W. Johnson and M. A. Veeder (note).....	401
Auxilliary quantities for computing precession, (note).....	87

Ball bearings, A simple method of mounting an equatorial axis on—F. L. O. Wadsworth.....	723
Barnard, E. E., Proper motion of stars in dumb-bell nebula.....	445
Preliminary note on the observations of Saturn and Uranus with the 36-inch equatorial.....	557
Photograph of Swift's nebula in Monoceros, N. G. C. 2237....	642
Great red spot and other markings on Jupiter.....	736
Nova Aurigæ (note).....	598
Tempel's periodic comet (note).....	598
Recipient of the Arago gold medal (note).....	81
Photographic nebulosities and star clusters connected with the milky way.....	177
On the forms of the discs of Jupiter's satellites as seen with the 36-inch equatorial of Lick Observatory.....	272
On the diameters of Ceres, Pallas and Vesta.....	341
Photographs of Gale's comet, 1894.....	421
Recent observations of Jupiter's satellites.....	438
Periodic time and distance of the fifth satellite of Jupiter.....	556
Present to the Royal Astronomical Society (note).....	783
Photographs of a remarkable comet.....	789
Photograph of M8 and the Trifid nebula.....	791
On the exterior nebulosities of the Pleiades.....	768
Great photographic nebula of Orion encircling the belt and Theta nebula.....	811
The form of the disc of the III satellite and phenomena of the occultation of a satellite of Jupiter.....	821
Belopolsky, A., On the motion of ζ Hercules in the line of sight.....	130
Bessemmer flame; Hartley's observation of C line of hydrogen in the—(note)....	770
β 101, 9 Argus, Note relation to—.....	518
Bibliography of astronomy (notes).....	261, 519, 603
Bigelow, Frank H., The polar radiation from the Sun, and its influence in forming the high and low atmospheric pressures of the United States.....	25
West Indian hurricanes and solar magnetic influence.....	441
Binary star O Σ 224, Orbit of—J. E. Gore.....	559
Binary stars, A graphical method of obtaining the orbits of—Charles P. Howard.....	425
Bolometer work at the Smithsonian Astro-Physical Observatory, Mr. Langley's recent progress in.....	41
Borst-Peters' star catalogue (note).....	417
Brashear's new optical works (note).....	700
Brester, A., Jz.—A short review of my theory of the Sun.....	218
On Brester's views as to the tranquillity of the solar atmosphere.....	849
Brightness of Nova Aurigæ, Change in the—(note)....	156
British photographs of the recent total eclipse of the Sun (note).....	83
Brorsen's Comet 1851 III (note).....	787
Bulow, Dr. Friederick Gustav von—Obituary notice	112
Burckhalter, Chas.,—Discovery of Comet <i>b</i> , 1893.....	170
Burnham, S. W.,—Proper motions of double stars.....	14
gold medal for—(note).....	169

- Burnham, S. W., Address delivered by the president of Royal Astronomical Society, Captain W. de W. Abney, on presenting gold medal to—..... 283
- The Pulkowa double star measures..... 354
- The variable proper motion of Procyon..... 434
- The orbit of 9 Argus..... 290
- Camera, The advantage of the short-focus—in spectrum photography, J. E. Keeler (note)..... 772
- Campbell, W. W., Observations of the new star in Norma..... 311
- Spectra of the Great Nebula in Orion and other well-known nebulae..... 384, 494
- The Wolf-Rayet stars..... 448
- Note on the spectra of Comets *b* and *c*, 1893..... 571
- spectrum of the Orion nebula (note)..... 695
- The spectrum of Mars..... 752
- On the accuracy of his measures in the spectrum of Nova Aurigæ (note)..... 69
- The use of the short-focus camera in stellar spectrum photography (note)..... 857
- On selecting suitable nights for observing planetary spectra (note)..... 860
- Canada, Reports from—(notes)..... 418, 518, 786
- Canals of Mars, J. R. Holt..... 347
- Cape observatory, A large telescope for the—(note)..... 770
- Catalogue for 1885, Pulkowa—(note)..... 597
- Catalogues of Harvard College Observatory, Photometric—(note)..... 598
- Causes of formation, motion and periodicity of sunspots, Mechanical—J. M. Schaeberle..... 278
- Centauri, α , Dr. Lee's researches on the orbit of—(note)..... 256
- Center of gravity for a homogeneous ellipsoid of revolution, Locus of—T. J. J. See..... 627
- Ceres, On the diameter of—Pallas and Vesta, E. E. Barnard..... 341
- Chabot observatory, Observations of the transit of Mercury, Nov. 10, 1894 (note)..... 868
- Chamberlin Observatory, 20-inch equatorial of—H. A. Howe..... 709, 826
- Chandler on observations of variable stars at Harvard College Observatory, (note)..... 325
- Chandler's criticisms of the Harvard photometric observations (note)..... 399, 416
- Change of sensitiveness in dry plates, The—G. W. Hough (note)..... 153
- in the brightness of Nova Aurigæ (note)..... 156
- Charroppin C. M., (note) 596; (note)..... 417
- Chart of the Heavens, Photographic—Observatory, Dec., 1893..... 20
- sky, Photographic—H. C. Wilson (note)..... 260
- Chicago Academy of Sciences, Section of mathematics and astronomy (see Academy of Sciences at Chicago)..... 87
- Meeting of—Jan. 3, 1894, T. J. J. See, 173;
Feb. 4, 1894, 262; March, 1894, 326;
April, 1894, 419; May, 1894, 518; June, 1894, 602; Sept., 1894, 708; Oct..... 782
- Chromatic aberration of telescopes—James E. Keeler (note)..... 157
- Chromosphere, The appearance of the D_3 line in the spectrum of the—(note)... 585

Chronograph, Electrical clock connections for operating the—G. W. Hough....	184
Cipher code for aurora observations, An international—(note).....	170
Clock connections for operating the chronograph, Electrical—G. W. Hough....	184
Cluster in Hercules, The great—(note).....	156
Coast survey office of the United States (note).....	414
C line of hydrogen in the Bessemer flame, Hartley's observations of the— (note).....	770
Code for Aurora observations, International cipher—(note).....	170
Cometary shooting stars, H. A. Newton.....	196
structure in the corona of April 16, 1893, J. M. Schaeberle.....	307
Comets, note on the spectra of—H. Kayser.....	204
for 1894 (note).....	72
Comet spectra, on the influence of the slit-width on the appearance of—367; (note) 505; H. Kayser (note).....	399
<i>b</i> and <i>c</i> 1893, note on the spectra of—W. W. Campbell.....	571
<i>b</i> 1894 (Gale), the spectrum of—(note).....	504
spectra, The nature of—.....	586
<i>b</i> 1893, discovery of—(note).....	170
<i>c</i> 1893 (Brooks), ephemeris of—for Jan., 1894, Wendell, So; March, 1894.....	255
<i>a</i> 1894, discovery of new—by Denning, 323; (notes).....	410, 511
(Denning) ephemeris of—(note) 514; elliptic elements of—(note).....	515
<i>b</i> 1894 (Gale)—(notes) 411; 512; ephemeris of—(note).....	513
Gale's—1894, May 3, frontispiece, 421; photograph of—E. E. Barnard	421
Gale's—(note).....	514
Brorsen's—1851, III (note).....	787
Photographs of a remarkable—E. E. Barnard.....	789
discovered in Australia new—(note).....	410
(1873 II) ephemeris of Tempel's second periodic—(note).....	411
Halley's—(note).....	352
of Holmes, search for—(note).....	324
in the corona of April 16, 1893—(note).....	515
notes for May, 1894, 410; June, 1894, 511; October, 1894.....	706
medals—(note).....	518
Tempel's periodic—(notes).....	514, 598
Tempel, II 1894, III (1873, II), new elements of—(note).....	706
1894 II (Barnard), The next return of—[note].....	871
notes.....	869
Comet's tail—discovered by Holmes (note).....	410
Companion of Sirius, Orbit of—(note).....	82
to Algol, Eccentricity of the orbit of—(note).....	516
Computing precession, Auxilliary quantities for—(note).....	87
Comstock, G. C., Results of an investigation of the aberration and atmo- spheric refraction of light, made with a modified form of the Leowy prism apparatus.....	329
George C., Note relative to β 101, 9 Argus.....	518
Concave gratings, On the astigmatism of Rowland's—J. L. Sirks.....	763
Control for the equatorial, Electric—G. W. Hough.....	524
of equatorials in photography, Electric—W. C. Gurley.....	641
Contents for January 1894, 176; February 1894, 264; March 1894, 328; April 1894, 420; May 1884, 520; June 1894.....	604

Constant of aberration (note).....	258
Constitution of the planet Jupiter, Physical—G. W. Hough.....	89
Controls and governors for astronomical instruments, Electric—F. L. O. Wadsworth.....	265
Copland, John A., Height of Auroræ (note).....	506
Dec. 1893, Meeting of the A. and P. S. of Toronto—.....	175
Jan. 1894, same.....	262
Cornu, A., A study of diffraction gratings, Focal anomalies—.....	207
Corona of the total solar eclipse April 16, 1893, Professor Schaeberle's photographs of—(note).....	169
of the total solar eclipse of April 16, 1893, Cometary structure in—J. M. Schaeberle.....	307
On some attempts to photograph the solar—without an eclipse, Geo. E. Hale.....	662
Cornu's spectroscopic investigations, Monsieur—G. E. Hale (note).....	57
Crew, Henry and Robert Tatnall, On a new method for mapping the spectra of metals.....	741
Cygnus, 61, Motion of—(note).....	84
Czapski, Theory of optical instruments by Dr.—(note).....	241
Davidson observatory transit of Mercury, Nov. 10, 1894 [note].....	866
Dawn of astronomy (note).....	259
Determination of stellar motions, Photographic—E. C. Pickering.....	521
Denning, W. F., New comet discovered by—.....	323
The radiant of the August Perseids (note).....	600
The Perseid radiant [note].....	872
Device for securing Mercury's surface undisturbed by Earth tremors (note)....	597
Diameters of Ceres, Pallas and Vesta. E. E. Barnard.....	341
Diffraction gratings, A study of—Focal anomalies—A Cornu.....	207
Discovery of new comet (see comet) asteroid (see asteroid)	
Disc of III satellite and phenomena of the occultation of Jupiter's satellites E. E. Barnard.....	821
Discs of Jupiter's satellites, as seen with the 36-inch equatorial of the Lick Observatory, E. E. Barnard.....	272
The form of—W. H. Pickering.....	423
The shape of—(note).....	517
Dispersion of fluorite and rock-salt, (note).....	772
Distance of Jupiter's fifth satellite, Periodic time and—E. E. Barnard.....	556
Distribution of the heat of the Sun, W. H. S. Monck.....	823
D ₃ line, Observations of a solar prominence and reversal of the—W. E. Woods (note).....	159
in the spectrum of the chromosphere, The appearance of the—(note)...	585
Domes and telescope mountings, W. H. Pickering.....	1
Double motion mechanism, Some new forms of—F. L. O. Wadsworth.....	527
star measures in 1892, by Professor Glassenapp (note).....	516
stars, Proper motion of—S. W. Burnham.....	14
star measures, The Pulkowa—S. W. Burnham.....	354
star apparently new, R. D. Sprague (note).....	417
star near H 3950 (note).....	516
Douglass A. E., The polar cap of Mars.....	738
Dry plates, The change of sensitiveness in—Geo. W. Hough (note).....	153

Dumb-bell nebula, Proper motion of stars in—E. E. Barnard.....	445
Duner, N. C., Is there oxygen in the atmosphere of the Sun?.....	215
Earth tremors, A device for securing a Mercury surface undisturbed from— (note).....	597
Eccentricity of the orbit of the companion of Algol (note).....	516
Eclipse of Sun April 5, 1894, Annular—.....	250
of the Moon, Partial—March 21, 1894, 165; Sept. 14, 1894.....	594
Observations of—.....	705
of the Sun, Total—.....	595
of the Sun, The British photographs of the recent total—(note).....	82
On some attempts to photograph the solar corona without an eclipse, Geo. E. Hale.....	662
Professor Schaeberle's photographs of the corona of the total solar— April 16, 1893 (note).....	169
Eclipses for the year 1894, H. C. Wilson (note).....	70
Effective temperature of the Sun, Experimental investigations on the—W. E. Wilson and P. L. Gray.....	382
Electric controls and governors of astronomical instruments, F. L. O. Wadsworth.....	265
Electrical clock connections for operating the chronograph, G. W. Hough.....	184
control for the equatorial, G. W. Hough.....	524
control of telescope, Apparatus for—(frontispiece).....	265
control of equatorials in photography, W. C. Gurley.....	641
Elements, On a certain law in the spectra of some of the—C. Runge.....	124
Elkin, W. L., Instrument for the photography of meteors.....	628
Ellipsoid of revolution, Locus of the center of gravity for a homogeneous— T. J. J. See.....	627
Encke's comet, Ephemeris of—by Buckland.....	870
Rediscovery of—[note].....	871
Equatorial axis, Method of mounting an—on ball bearings, F. L. Wadsworth.....	723
Electrical control for—G. W. Hough (frontispiece).....	521
Electric control for—G. W. Hough.....	524
Electrical control of—in photography, W. C. Gurley.....	641
of Chamberlin Observatory, 20-inch—H. A. Howe.....	709, 826
Quick adjustment of—(note).....	171
Equatorials in photography, electrical control of—W. C. Gurley.....	641
Errata (notes).....	419, 788
Hartwig's Algol variable (note).....	786
in photograph of Gale's comet (note).....	706
in the August number (note).....	700
Disk of Jupiter's satellite.....	603
Espin, T. E., The spectrum of α Herculis.....	651
Experiments on the radiation of heated gases (note).....	859
Extraordinary phenomena (note).....	172
Exterior nebulosities of the Pleiades, On the—E. E. Barnard.....	768
Faculae, The solar—G. E. Hale.....	113
Fenyi, J., S. J., On two great protuberances.....	122
Ferry, E. S. and E. P. Lewis, The infra-red spectra of metals.....	747
Fixed-arm spectroscopes—F. L. O. Wadsworth.....	835
